Vayunova Solutions LLP

Since 2014, Vayunova solutions has been driven by a relentless pursuit of network innovation. We believe in a network that grows smarter, more agile, and more responsive every day. Vayu Group provides specialized people, processes, and software to ensure maximum value on network integration, design, orchestration, and optimization projects.. Vayu makes your social / entertainment / business existence REAL.

Title: - Project Manager

Position Summary: - A project manager for the implementation of different vendor Platform will be required to implement solutions spanning differing continental regions. They will actively create and lead a matrix team of regionally based resources which will include engineering, project management, installation and commissioning. The project manager will actively interface with the customer to manage the implementation from project initiation to handover to operations. The project manager will be required to travel internationally to attend regular customer meetings

Rewarding Experience. Meaningful Outcomes.

Making a difference in people's lives through design and implementation of leading network technologies. That's what motivates us.
Embrace diversity. Celebrate inclusion. Champion ideas. From across the table to around the world, our path to innovation comes from our friendly environment and outstanding people. That's the Vayunova Solution.

The contribution

- ❖ Own and understand the contractual scope of work and translate into:-

    - ➢ Project Initiation. Conduct formal initiation of new projects to ensure all relevant stakeholders implementation Service and the customer understand and take ownership for the deliverables required by the project management plan.
    - ➢ Project management plans fully documenting the methodology, processes and procedures to be utilized during the implementation.
    - ➢ Work packages. Develop, review and approve. Work package frameworks detailing the scope of supply for service suppliers, internal and external. These will be used ensure implementation across the international regions of the project is consistent and meets the desired specification.
- ❖ Activity and Resource Schedules. Identify activity and resources requirements with each of the regions to develop a single cohesive project plan & schedule to meet deliverable requirements (specification, time, cost and quality).
- ❖ Team with other project managers located in other international locations.
- ❖ Team with the Project Engineer to ensure the low level engineering design and test plans as complete, approved and ready for use as defined in the project plan

- ❖ Establish and maintain risk, issue and change control regimes. Arbitrate and actively drive and participate in the decision making process, balancing the needs of the project and Vayunova's business needs.
- ❖ Attend frequent contract control meetings with the Program Team. Brief the customer on progress and major risks to the implementation.
- ❖ Reporting. Formally document and communicate project status for the customer with exceptions and resolutions on a weekly basis.
- ❖ Close projects to satisfactorily meet customer deliverables and VAYU's fiscal requirements.
- ❖ Participate and prepare for lessons learned to foster a culture for continual improvement
- ❖ Actively track project costs, profitability and contribute to the ongoing development of new revenue opportunities, both product and service.
- ❖ Performs other duties as assigned

Success Will Evidence Itself In The Following Ways

- ❖ Demonstrated track record of project delivery telecommunications.
- ❖ Recognized by customers as the partner of choice for systems roll-out.
- ❖ Ability to deliver projects on schedule, at the expected quality and within budget

Ideal profile

- ❖ Expert knowledge and experience in the Greenfield and Brownfield network Rollout in Telecom.
- ❖ Good verbal and written communications skills especially for technical updates.
- ❖ General knowledge of computers and application programs.
